

## Shawn P. Conlin

### Overview

Versatile IT professional known for his unique perspective seeks to bring over 15 years of application development, database administration, project management, and technical support experience to a full-time position.

### Professional Highlights

#### Software Development

- Planned, designed, and implemented a multifaceted website using PHP and MySQL. The site included content management, workflow solutions, and reporting options
- Developed backend PHP scripts for automating procedures such as data import routines and conversions.
- Performed full lifecycle development including requirement gathering, drafting specification documents, coding, QA testing, and training.
- Developed a generic workflow template for Lotus Notes, which resulted in a 40-60% reduction in application development time.
- Created multi-platform applications to integrate diverse systems within a single interface.

#### System Administration

- Configured AS/400 and Windows 2003 servers to integrate Lotus Domino with existing systems and databases, including Oracle, MS SQL, and DB2.
- Planned and performed server and client upgrades for Lotus Notes/Domino versions R5 through R7.0.3 including implementing client upgrades via the SmartUpgrade functionality, which resulted in an 83% reduction in time and 70% reduction in personnel resources to complete the process.

#### System Testing

- Developed and implemented test plans and cases for analyzing integration software between a main application and thirteen third-party applications.
- Learned how to configure, operate, and integrate fifteen independent systems in under six months.

### Skills

- Full Lifecycle Development
- Problem Solving/Analysis
- Object Oriented Programming
- Project Management
- Troubleshooting
- PC Hardware Configuration
- PC Software Configuration
- Network Configuration
- Customer Service

#### Languages

- PHP
